Diabetes Epidemiology and Management

LIGNE ÉDITORIALE *Overview*

Spin off title published in association with Diabetes & Metabolism, Diabetes Epidemiology & Management is a peer- reviewed gold open-access e-only publication. The journal welcomes original articles, reviews and meta-analyses, pilot studies, reports that assess drug and medical device safety and tolerability in all phases of development. The Editors will especially encourage the publication of real-world data and papers on digital technologies, medical devices for diabetes using the data driven approach based on artificial intelligence, leading to remote monitoring and thus be able to cover new grounds with the journal. New formulations and changes in practice guidelines and standards are also welcome for publication. Viewpoints, editorials and research letters will complete the editorial offer.
