Journal of Allergy and Hypersensitivity Diseases

Société Française d'Allergologie

LIGNE ÉDITORIALE *Overview*

The Journal of Allergy and Hypersensitivity Diseases (JAHD) is an international, peer reviewed, open-access journal in the fields of allergy, clinical immunology and hypersensitivity diseases. It aims to impact and communicate excellence in all aspects of the fields, including clinical, educational, and translational research, associated with new technologies, epidemiology, public health and environmental aspects to a wide audience. All JAHD content cover the spectrum of conditions managed by health care professionals in clinical practice (anaphylaxis, drug-related allergy, food and insect sting allergic and hypersensitivity conditions, allergic and hypersensitivity conditions affecting the eyes, skin and respiratory tract conditions, eosinophilic and mast cell disorders) as well as epidemiological, environmental, mechanistic and diagnostic research. The JAHD will present results from these areas in original papers, review articles and short communications. This research must advance the understanding of allergic or hypersensitivity conditions or medical treatment and contribute to improving the quality of care of patients worldwide.
