Ethics, Medicine and Public Health

LIGNE ÉDITORIALE *Overview*

Ethics, Medicine, and Public Health is an international, multidisciplinary peer-reviewed e-only journal. It publishes original articles, reviews and short reports on all ethical aspects of science, practice of biomedical research and public health. In this prospect, reflection willingly integrates historical, philosophical, sociological, ethnological, anthropological and spiritual perspectives, with the aim of improving the care of the human person in all its facets - from its conception until after its death. It is aimed at all biomedical researchers and public health practitioners, and those who manage bioethics and medical anthropology. It will also be of interest to anyone involved in providing global health policies, public health programs, scientific integrity, and professional ethics bringing together multiple expertise - achievement of interdisciplinarity - in the service of ethical reflection both in research and with patients. The Editors are particularly attentive to articles discussing tensions raised by the confrontation between legal issues and medical practice. The journal also publishes invited articles, reviews and special issues from leading experts on topical issues. Founded in 2015 by professors Christian Herve (Universite de Paris, France) and David Weisstub (University of Montreal, Canada).
