The American Journal of Surgery

Overview

*The American Journal of Surgery* is a paid circulation, refereed journal reaching approximately 6,000 surgeons, who are buying influencers in this market. These include general surgeons who perform abdominal, cancer, vascular, head and neck, breast, colorectal, and other forms of surgery. Ninety percent of AJS subscribers are board certified and the rest are board eligible. AJS is an independent medical journal providing superior clinical editorial articles and is the official publication of several major surgical societies. In addition to publishing some of these societies’ rigorously review annual meeting papers, the AJS publishes free-standing, independent peer-reviewed articles. This provides for superior editorial content and balance. All articles are referenced in Medline and are thus part of an international referenced source of medicine and surgery. Two of every three subscribers are high readers and more than half indicate that they read every issue. More than 90% of all respondents to a recent survey had read all or part of a test issue. AJS has one of the highest readership-to-recipient rates in the field, and in a recent year readers placed orders for nearly 20,000 reprints.

Specifications

File Format

**PDF or PDF/X-1a compliant files, saved as PDF version 1.3.**

Transparencies within the supplied PDF(s) will be warned. The transparent elements contained in your file(s) must be converted within the native layout application or flattened in Acrobat using the High Resolution Flattener Presets to avoid overprint issues.

Saving your PDF to Acrobat 4 (PDF 1.3) compatibility will ensure transparent elements are flattened. If the ad contains spot colors that are not converted to process colors (CMYK) before flattening, overprint and/or trap issues may occur.

The following layout applications yield the optimum results for creating a print-compliant PDF and are expected to follow all requirements listed in this document:

- InDesign version 2 or higher (CS preferred)
- QuarkXPress version 6.5 or higher

Additional costs may apply if problems are encountered.

*NOTE: When using Adobe Illustrator it is preferred to have all fonts converted to outline/paths, and files submitted as EPS files.*

Images

All high-resolution images and fonts must be included. TIFF & EPS files must conform to the following minimum resolution specifications:

- Grayscale and Color images: 300 dpi
- Combination Grayscale and Color images: 500-900 dpi
- Line art (Bitmap) images: 900-1200 dpi

Higher image resolutions are acceptable as they exceed the minimum requirements, but in some cases unnecessary resolution will be discarded to achieve smaller file sizes.

Fonts

Use of PostScript Type 1 fonts is encouraged. Include fonts for any embedded graphics. DO NOT use Type 3 or Multiple Master fonts. Avoid using Macintosh menu-stylized fonts, Macintosh "city" fonts (Chicago, Geneva, etc.) and Microsoft Outlook fonts (Tahoma, Impact, etc.).
**Page Layout**
Regardless of the file format supplied, all ads must conform to the following specifications:

- Final size must meet journal trim size and include 1/8” bleed image on all four sides.
- Files will include trim marks with a minimum 3/16” offset
- No content is to be within 1/4” of all trim edges.
- Supply as single page files only
- Right Reading, Portrait Mode, 100% size, No Rotation.
- All fonts and graphics must be either embedded or included with the files and conform to the format type listed above. Images must also conform to the specifications above for minimum image resolution.
- All color ads should be supplied as composite files.
- Reverse type should be no less than 6pt. Fine lettering (thin lines, serifs) should be restricted to one color.
- Embedded images should not be scaled, cropped/masked or rotated within the page layout application but instead should be manipulated in a proper image editing program (ex. Photoshop) and then imported into the page layout program at proper size and position.
- DO NOT nest EPS files within EPS files.
- All lines and line art images should be of a minimum 1/3 pt thickness (1/2 pt for reverses) at final size to reproduce effectively on press.
- Crop marks and SWOP color bars must be included and positioned 1/2” outside trim.

**Color Space**
All color images and files are to be supplied as CMYK with a Total Area Coverage (TAC) not to exceed 300% for the darkest area of an image. Files supplied as RGB will be automatically converted to CMYK.

**Spot Colors**
Spot colors are to be identified using the standard Pantone naming convention and not a custom color such as "Dark Blue." PMS colors will be converted to process unless otherwise specified. When using both art and layout programs be sure spot color naming is consistent in all applications (ex. Do not define both PMS 201CV and PMS 201CVC). Any non-intended spot colors will be converted to CMYK.

**Trapping and Screening**
Overprints and knockouts should be defined. Files are NOT to be trapped or prescreened. Our Prepress service provider will use industry recognized trapping software to auto-trap your files for optimum performance and reproduction on press and will apply the appropriate screening. Note that these trap settings may force small text and fine graphics to overprint to hold registration on press.

**Proofs**
If submitting a proof for color match on press, please send a SWOP-certified contract color proof (with SWOP proofing bar or GATF proof comparator), produced from the final submitted file and imaged at 100% scale. Revised proofs must be supplied whenever a text or design change is made. For a list of current SWOP-approved proofs visit [https://idealliance.org/systems-certification/certified-hard-copy-proofing-systems/](https://idealliance.org/systems-certification/certified-hard-copy-proofing-systems/). Desktop inkjet printer proofs do not meet SWOP specifications. Elsevier cannot guarantee color match unless acceptable proof is provided. If a contract proof is not supplied Elsevier will run to standard ink densities and dot gains.

**Delivery**
Submit PDF ad files to Elsevier ad portal at [www.ads4els.com](http://www.ads4els.com)

**Conformance to Specs**
Variance from the above specifications may not yield results that conform to Elsevier quality control standards.
