Overview

The Journal of Cartilage & Joint Preservation will capture the best clinical, translational and basic science articles in this rapidly growing area of discovery and expertise. JCJP will publish peer-reviewed original research articles and state-of-the-art reviews, as well as techniques videos showing the applications of new findings to the care of patients in need of cartilage repair and joint preservation.

Because it sits at the intersection of basic and applied research, JCJP will bring important new findings to the toolbox of all researchers and clinicians involved in cartilage repair, development, function, degeneration, transplantation and rehabilitation, and with a strong new emphasis on joint preservation, including cartilage restoration techniques such as microfracture surgery, drilling, abrasion arthroplasty, autologous chondrocyte implementation, osteochondral autograft transplantation and osteochondral allograft transplantation.

To sponsor a print collection of articles for conference distribution, please visit http://reprints.elsevier.com/.
