Overview

Advances in Nutrition (AN/Adv Nutr) publishes literature reviews focused on key findings and recent research in all areas of interest to nutritional scientists and biomedical researchers. This would include nutrition-related research efforts directed toward biochemical, molecular, and genetic studies utilizing experimental animal models, domestic animals, and human subjects. The other major foci of the journal are in clinical nutrition, epidemiology and public health, and nutrition education. Review articles will focus on progress made during the past few years rather than research developments over a broad, historical timeframe.
