JACC: Case Reports

Overview

JACC: Case Reports is one of a family of specialist journals launched by the renowned Journal of the American College of Cardiology (JACC). It provides an educational platform for promoting clinical cases and clinical problem solving. It accepts everyday educational or rare clinical cases, well described and with clear learning objectives, from across the field of cardiovascular medicine. The journal aims to serve as a publication vehicle for early career cardiologists and members of the cardiovascular care team, and as a forum for mentorship on the review and publication process.
