ESMO Open

Overview

ESMO Open is the European Society for Medical Oncology's online-only, peer-reviewed open access journal, dedicated to publishing high-quality medical research and educational content from all disciplines of oncology, with a focus on innovative clinical and translational cancer research. The Journal aims to maximize industry networks to curate and disseminate preclinical or translational data. We hope to bridge the gap between basic research and clinical applications, facilitating the translation of groundbreaking discoveries into tangible advancements in cancer care. Our platform will serve as a catalyst for innovation, nurturing the dialogue between academia, industry, and clinical practice.

The journal aims to publish research in all disciplines, experimental, translational, diagnostic and therapeutic areas related to oncology, including original articles, reviews, editorials, correspondence, brief reports, research letters, clinical assay interpretation, diagnostic test presentations and viewpoint articles. In addition, the journal welcomes phase I trials and meta-analyses, and will also publish reviews from important European Society for Medical Oncology (ESMO) conferences and meetings as well as position statements on behalf of ESMO.
