Travel Medicine and Infectious Diseases

Overview

Travel Medicine and Infectious Disease publishes original papers, reviews and consensus papers on all aspects of travel medicine and infectious disease. Focus areas include epidemiology and surveillance of travel-related illness, vaccine-preventable disease, malaria prevention and treatment, travellers’ diarrhoea, migrant health, wilderness and expedition medicine, sports, aviation and maritime medicine, environmental and psychological hazards of travel, global policy/regulations for disease prevention and control and practical clinical issues for travel and tropical medicine practitioners. The journal also covers areas of controversy and debate in travel medicine particularly where this may inform guidelines and policy pertinent to travel medicine and the prevention of infectious disease.

Travel Medicine and Infectious Disease aims to publish cutting edge papers and offers a fast peer-review process with early on-line publication of accepted manuscripts.
