

Research in Diagnostic and Interventional Imaging

Official journal of the Société française de radiologie (SFR)/Organe officiel de la SFR

LIGNE ÉDITORIALE Overview

Research in Diagnostic and Interventional Imaging (ReDII) is a high-quality, peer reviewed, open-access and online-only journal focusing on research articles in diagnostic and interventional imaging, whatever the subspecialty. The journal welcomes publications originating from any part of the world and focuses only on original research. Acceptance is based on the scientific merit and the methodological quality of the manuscript, regardless of novelty/trendiness. We do not publish case reports/case series, reviews nor editorials. All articles are published in English.

Research in Diagnostic and Interventional Imaging publishes either full-length original research articles or short research letters, with simplified instructions-to-authors. As an open-access publication, we aim to provide the highest standards in ethics and rapid turnaround times, with a time-to-first decision below 5 weeks. Our main goal is to disseminate high-quality publications in diagnostic and interventional imaging, so as to advance research in radiology - as a whole.

RÉDACTION Editorial board

- Rédacteur en chef/Editor-in-Chief: M. Ohana
- Rédacteurs associés/Associate Editors: J. Arfi-Rouche, G. Boulouis, L. Derclé, M. Faruch-Bilfeld, T. Jacques, M. Lederlin, I. Millet, A. Paisant, F. Pontana
